

If you have anything in the stock line for sale, see G. A. Swinebroad.

G. A. Swinebroad will buy all kinds of live stock, and has on hand at all times live stock for sale. Will trade, swap or barter.

Ten thousand harvest hands will have to be imported into Kansas and Oklahoma the coming season to save the wheat crop.

It is estimated that there are over 7,000 grain mills in Russia, grinding annually over 16,000,000 tons of grain.

Newton, Kansas, has just shipped to California a train load of eggs. There were 12 huge refrigerator cars, containing 144,000 dozen, of nearly 2,000,000 eggs.

Four new wheat warehouses at Tacoma, Wash., the last of which is nearing completion, have a storage capacity of 3,250,000 bushels.

The exports of butter from Russia for the first ten months of the calendar year 1901 are given at 37,729,220 pounds.

The 1900 wool clip of Oregon was about 18,000,000 pounds; about 1,500,000 pounds were produced in the Willamette valley, and the remainder in the eastern portion of the State.

Cutworms are doing much injury to tobacco plant beds and early corn in Woodford county. One farmer had a plant bed forty feet in length entirely destroyed by cutworms.

The farmer who sows clover with oats is pretty sure to get a satisfactory stand. A failure is rare. Plow in with a double shovel, sow the clover seed and brush or harrow lightly.

In many portions of Mississippi fifty per cent. of the cotton crop will have to be replanted, and in some sections of the State the price of seed is so high that many farmers are not able to purchase enough to make a second planting.

The farmers of Kansas will produce about one million pounds of Burley tobacco this year. Former Kentuckians are said to be interested in the cultivation of the "weed" in this State, and are hopeful of making it a profitable crop.

A small black bug, new to this section, has attacked the tobacco plants and are playing destruction with them. South of town they are particularly destructive. Some farmers are buying hemp seed to replace tobacco. —Lexington Gazette.

It is estimated that the profits from the may corn "corner" are between \$500,000 and \$700,000.

B. F. Patton and Jeff Dunn have returned from the mountains, where they bought a lot of stock. They report stock rather scarce and prices stiff.

Tobacco plantbeds in many portions of Bourbon county have been almost entirely ruined by cut worms, necessitating replanting. Some raisers have used soaked seed in the second planting with but indifferent success.

Implements should be suited to the soil and crops grown. Occasionally a tool will be found that will do good work in all soils, but this is not usually the case. To know a good tool and when it is doing good work in the field requires some intelligence.

Very few lambs are engaged and the traders appear to be in no haste about making purchases. The notion prevails that the lambs this spring are not healthy, and developments are awaited. At this time last spring nearly all the lambs in the county were engaged at good prices. —Boone County Recorder.

A man can steal from a bank, a merchant or a corporation, but he can not steal from old mother earth on the farm. The soil may be robbed in a sense by being made to grow worthless products, but the man is never benefitted thereby. A man may beat his neighbors, but he can never beat his farm. It is always and ever true that whatsoever a man sows that shall he also reap. —Field and Farm.

It is reported by several responsible farmers that the chance for a large tobacco crop in this county has been cut short from the fact that some kind of fly or cut worm, has gotten into the plant beds under the canvass and eaten all the plants, not leaving a single one. This is reported to be the case between New Castle and Turners and between New Castle and Drennon Springs. —Eminence Constitutionalist.

Carefully consolidated reports from American agriculturists' corps of observers made May 1 show the condition of winter wheat to be 91.5 against 95.5 last months and compared with an average at this date for five years of 84. April was wholly favorable for the development of the wheat crop over the greater part of the belt. The report shows little damage through insect pests outside of Texas, Oklahoma and Michigan. No crop in twenty years has stood better than the present one in all important features of roots and stools. The condition May

1 of wheat by States include Ohio 88, Kentucky 85, Michigan 83, New York, Pennsylvania and Indiana 95, Illinois 96, Kansas 100, California 90.

Judge H. B. Watts, a Hereford breeder of Fayette, Mo., has a pure-bred Hereford cow whose record as a prolific breeder is probably unequalled. She dropped her first calf a few days after she was three years old, and in the next five years and eight months dropped eight more, making a total of nine by the time she was eight years and eight months old. Her best year was 1899, for in January she gave birth to one calf and had three more in December. Her owner has realized \$2,160 from the sale of her products, and still retains her last calf. The triplets referred to above attracted much attention at the Hereford show sale at Kansas City last fall and sold at auction for \$200, \$210 and \$225 respectively.

SUPREME IN ITS BEAUTY

PAN-AMERICAN EXPOSITION TO BE A MAGNIFICENT SURPRISE.

Birdseye View of the Great Group of Splendid Architectural Works—A Wonderful Setting of Fountains, Pools, Plants and Flowers.

It is promised for the Pan-American Exposition that it will surpass in beauty any previous exposition in the world's history. It is also expected that it will outlive its predecessors in many other ways, for at no time have such wondrous achievements in all arts, such perfection in the hundreds of trades, been attained. But the purpose of this article is to treat, in a general way, of the plan of the Exposition, the symmetry of arrangement and the exterior beauty that represents the careful expenditure of several millions of dollars. Accompanying this article is a birdseye view of the Exposition plot, showing the magnificent work in its complete state. The view is from the south and shows an area one mile and a quarter long and half a mile wide, there being 350 acres in the inclosure. In the immediate foreground is a portion of Delaware Park, one of the famous beauty spots of Buffalo. The view shows the Park Lake, with the North Bay at the left, and in the left foreground, south of the bay, may be seen a portion of the Albright Gallery of Art, a beautiful permanent building of white marble, the gift of John J. Albright of Buffalo, and costing over \$400,000. North of the Bay is the New York State Building, also a permanent structure of marble. These two buildings are in the style of Greek temples, one containing reminders of the Parthenon and the other resembling somewhat the Erechtheum upon the Acropolis at Athens.

Between the North Bay and the Lake the City of Buffalo has built at large expense a new and beautiful bridge of heavy masonry, known as the Bridge of the Three Americas. This bridge carries the broad thoroughfare which leads from the main southern entrance to the approaches of the Exposition, as seen in the foreground just north of the Lake. On the northern shore of the Lake is situated the life saving station erected by the Federal Government where daily exhibitions will be given by a crew of ten men showing the uses of modern life saving apparatus as employed upon our coasts. Hidden from view, upon the southern bank of the Lake, a beautiful casino and boathouse has also been built by the City of Buffalo for Exposition uses.

The symmetrical grouping of buildings will be at once noted by the observer. Beginning at the formal approach, just north of the Lake, the eye follows northward between two rows of ornamental columns to what is known as the Forecourt. East of this are the State and Foreign buildings, forming in themselves a very interesting feature of the Exposition. Near these also are the buildings for the special ordnance displays representing the products of several hundred manufacturers in this line of work. West of the Forecourt will be the outdoor horticultural displays and the Women's building. We cross now the Triumphal Bridge, which will be remarkable for its tall piers, richly ornamented with statuary, the product of the genius of Karl Bitter, the director of sculpture, and other famous sculptors. On either side are the Mirror Lakes which form a part of the Grand Canal, more than a mile in length, which surrounds the main group of buildings.

We come next to the Esplanade, which is nearly two-fifths of a mile long and 450 feet wide. The western end of the Esplanade is inclosed by the Horticulture, Graphic Arts and Mines buildings. The eastern end is shut in by the Government group of three large buildings. Sunken gardens with elaborate fountains and many groups of sculpture occupy the two arms of the Esplanade, and the decorative features throughout this broad space are very numerous and beautiful. North of the Esplanade is the Court of Fountains, with the Ethnology building on the right and the Music building on the left. Two subordinate courts also open into the Esplanade from the north, the one on the right being known as the Court of Cypress and the one on the left as the Court of Lilies. Next, north of the Ethnology building on the right and fronting upon the Court of Fountains, is the Manufactures and Liberal Arts building and on the opposite side the Machinery and Transportation building. In the Court of Fountains is a large pool, having an area of about two acres and containing

ing many beautiful fountains. Proceeding again northward we come to the Mall, a broad avenue, half a mile long, extending from the eastern boundary to the western gate of the Exposition. Fronting upon the Mall on the right is the Agriculture building and on the left the Electricity building. We now arrive at the most conspicuous feature of the Exposition, the massive Electric Tower, 391 feet in height. This tower stands between the Court of Fountains and the Plaza, in a broad pool, about two acres in extent. This will be the most ornamental feature of the great Exposition and will be the centerpiece for special and elaborate electrical illumination. Immediately north of the Electric Tower is the Plaza, with its beautiful sunken garden and bandstand in the center, the Propylaea or monumental entrance at the north, the entrance to the Stadium on the east and the entrance to the Midway on the west.

It should be understood by every intending visitor that the Exposition will present the most beautiful spectacle that twentieth century genius can provide. By day there will be a most pleasing display of floral and fountain effects. The many buildings, with their elaborate and delicate tracery of ornamental plastic work and their radiance of color, the many groups of statuary in every part of the grounds, will constitute a picture never before paralleled. At night all the buildings will glow with the soft radiance of thousands of electric lights, making a scene of unrivaled brilliance and splendor. Half a million lamps will be used in the electrical illumination.

It should also be added that the Midway at the Exposition will be the most extensive and novel that has ever been prepared. It will be 3,000 feet long, having more than a mile of frontage. Over 20 very interesting features, many of them covering several acres, will make up this gigantic collection of wonders.

The athletic features of the Exposition will be shown in the Stadium, which covers about ten acres of ground and contains a seating capacity for more than 12,000 people. All of the exhibit buildings will be filled to completion with the very latest products of Pan-American genius and industry and will offer an opportunity for every inquiring mind to learn a most interesting lesson of New World progress and civilization.

The power for Exposition uses is furnished principally from Niagara Falls, which are situated only a few minutes ride from the Exposition grounds. Buffalo is a city of nearly 400,000 population and is preparing in every possible way for the reception of millions of visitors in 1901. MARK BENNETT.

DAVIDSON & LANDRAM. Real Estate Agents. — LANCASTER, KY. —

Having associated ourselves together for the purpose of doing a general Real Estate business, we offer our services to the public, both to those who wish to buy and those who wish to sell. Those who have farms, or other real estate they wish to sell will please call at the law office of R. L. Davidson, over Stormes' drug store, and list their property for sale with us. We will advertise it extensively in the CENTRAL RECORD, also by hand-bills and business cards, and make no charge for our services unless a sale is made either directly or indirectly. Titles will be examined, contracts and deeds written, mortgages released, etc., without extra charge.

If you have property for sale you can sell it quickly and to your advantage by listing it with us. Below is a partial list of the property already listed with us:

No. 1, House and Lot in McCreary Ky. Fine location for Doctor or Merchant.

A new and very convenient one-story frame house, four rooms, hall-way, 3 verandas and a summer kitchen attached, good cellar, every convenience in the way of outbuildings, barn, buggy house, etc. Good garden plot with strawberry bed and a nice, young orchard, splendid cistern and a stock pond that never fails. Everything is new and convenient. Price is right and terms easy.

No. 2, Vacant Lot in Lancaster.
This Property is Cheap and will go Quick.

On East side of Hill street, 70 feet front and 325 feet deep, or 425 feet deep if desired; a part of the Dr. O. P. Hill property. Splendid building site for a nice residence, in a good neighborhood and one of the best residence portions of the town; in short, a desirable location in every particular.

No. 3, Vacant Lot in Lancaster.
Price, Low. Terms to suit Purchaser.

On East side of Hill street, adjacent to item No. 2, 70 feet front on Hill street; 325 feet deep or 425 feet deep if so desired; a part of the Dr. O. P. Hill place. Good location, in excellent neighborhood; building site good and commanding.

No. 4, Farm of 52 Acres, on Middle Fork of Sugar Creek, 4 Miles from Lancaster.

Known as the old "Stone Place." Much of the land has been in grass, but is now under cultivation, 20 acres of good tobacco or hemp land; the rest is rich and productive. Never-falling water and tenebrine in good repair. Land has been well treated. 15-story box house 4 rooms and a porch, splendid cistern, new barn, hen-house, smoke house, etc. Three-fourths acre for a garden plot.

No. 5, Farm of 86 1/2 Acres, on the Sugar Creek Pike, 2 1/2 miles from Lancaster.

55 acres under cultivation, 25 acres of which have been sown in oats and grass. 25 acres of fine tobacco or hemp land, brings fine wheat and corn, remainder in grass. Stock water in abundance—Sufficient throughout last year's drought; large well-selected orchard, new fruiting; whole place under good fence. 5-room cottage residence, barn, ice house and all necessary out-buildings, splendid cistern, etc. Well worth what we want for it.

No. 7, House and Lot in Danville, Ky., in Otter Addition on East Main Street.

House has 8 large rooms, front hallway, above and below, back hall veranda, handsomely finished inside and conveniently constructed, large bath room, complete outfit of fixtures for water and gas, cistern, large stable and all other convenient outbuildings. Lot is 100 feet front, 47 feet in depth, nice stable lot and large garden. Is a good residence portion of Danville. This property speaks for itself.
